## G3C - 95

Also occasionally shown with a roman numeral: GIIC. G for Galaxy, a series of Panamsat communications satellites. G3C is located at 95 degrees west longitude and is a secondary Hughes satellite.

The footprint map for G3C is shown below. All footprint maps have to be considered as approximate. [.74 meter](#) dishes need at least a 46 dBW signal for reception. There is no user experience available to validate the map.
